

**National Interagency Coordination Center
Incident Management Situation Report
Sunday, August 18, 2019 – 0530 MT
National Preparedness Level 2**

National Fire Activity

Initial attack activity:	Light (106 new fires)
New large incidents:	8
Large fires contained:	6
Uncontained large fires:***	18
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	0
Type 2 IMTs committed:	1

Nationally, there are 40 large fires being managed under a strategy other than full suppression.

*** Uncontained large fires include only fires being managed under a full suppression strategy.

Southern Area (PL 2)

New fires: 13
New large incidents: 5
Uncontained large fires: 6

* **Fair Lawn**, Oklahoma DOF. Two miles east of Snyder, OK. Brush and tall grass. Active fire behavior with creeping and isolated torching.

* **Green Juniper**, Texas A&M Forest Service. Fourteen miles south of Claude, TX. Brush and short grass. Moderate fire behavior.

* **Henson**, Texas A&M Forest Service. Eighteen miles northwest of Hamlin, TX. Brush and short grass. Moderate fire behavior.

Copper Break, Texas A&M Forest Service. Eleven miles northwest of Crowell, TX. Brush and tall grass. Extreme fire behavior with wind-driven runs.

Caverns Road, Texas A&M Forest Service. Seventy-five miles south of San Angelo, TX. Brush and short grass. Active fire behavior. Residences threatened.

Henderson Robertson, Texas A&M Forest Service. Sixteen miles southwest of Ozona, TX. Brush and short grass. Moderate fire behavior.

MNF – National Forests in MS, USFS

Great Basin Area (PL 2)

New fires: 14
New large incidents: 1
Uncontained large fires: 4
Type 2 IMTs committed: 1

Nethker, Payette NF, USFS. Transfer of command from IMT 2 (GB Team 3) back to the local unit will occur on 8/20. Thirty miles northeast of McCall, ID. Timber and closed timber litter. Moderate fire behavior with smoldering, creeping and isolated torching. Numerous structures threatened. Evacuations, area, road and trail closures in effect.

Wood Canyon, Carson City District, BLM. Seventy-five miles south of Winnemucca, NV. Timber, chaparral and short grass. Minimal fire behavior with smoldering. Reduction in acreage due to more accurate mapping.

Cove Creek, Salmon-Challis NF, USFS. Twenty-seven miles northwest of Salmon, ID. Timber and tall grass. Minimal fire behavior with creeping, backing and wind-driven runs. Structures threatened. Trail closures in effect.

Corta, Elko District, BLM. Eight miles southeast of Jiggs, NV. Timber, brush and tall grass. Minimal fire behavior.

* **Little Bear**, Dixie NF, USFS. Seven miles southeast of Hatch, UT. Timber. Active fire behavior with running, long-range spotting and torching. Last narrative report unless significant activity occurs.

Predictive Services Discussion: The Four Corners High will strengthen as it drifts west. Temperatures across the Inland West will start to rebound as the Four Corners High begins to strengthen as it migrates west. Monsoonal convection will increase in coverage across southeastern Arizona. Temperatures along the West Coast will remain near average as a weak on shore flow continues. Isolated storms are possible across Yellowstone National Park and across southwestern Montana. Showers and storms will be possible from the Great Lakes southwest into Oklahoma as a cold front slowly pushes east.

<http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

Hazard Tree Secure Felling Area

Felling Safety Category

The following fundamental safety principles for tree felling operations have been established based on repeated lessons learned following serious accidents. To protect sawyers, swampers, and operational personnel from exposure to potential traumatic injury or death during tree felling operations, the following safety procedures should be applied to all felling activities. Fireline supervisors should continue to monitor all felling operations to ensure the following safe job procedures are consistently applied:

- A secure felling area, **MINIMUM OF TWO AND ONE HALF (2.5) TIMES THE HEIGHT OF THE MATERIAL BEING FELLED IN ALL DIRECTIONS**, needs to be established and maintained by the faller during all tree felling operations. In addition, the entire downhill side on slopes must be secured if materials can fall/role for a long, unpredictable distance.
- No one shall be permitted in the secured felling area without the authorization of the faller.
- The faller shall establish a safety zone outside the secured area, and direct EVERYONE to remain there until all felling is completed, and an "all clear" has been communicated.
- Safety zones should be established, whenever practical, in the opposite direction of the planned fall, and at a distance of at least 2.5 times the height of the trees being felled.
- The faller shall assign lookout(s). The lookout(s) shall have reliable communications with the faller, and other personnel adjacent to the secure areas.
- Competent lookouts shall be established and maintained by the faller at all major access points of roads and trails that afford access to the secured felling area.

The faller will ensure that no hazards remain such as hang-ups, unstable logs, or other dangers before approving access or leaving the secured area.
